How many months does it take for an apple to decompose in the nature?

answer: around 2 months

How many types of recycling bins exist?

answer: 6

What is the maximum amount of hours a day you should spend in front of a screen?

answer: 1 - 2 hours

What percentage of the world's water bodies are polluted by plastic?

answer: 80%

What percent of the Earth's air is polluted?

answer: 91%

How many trillions of kilograms of plastic is produced every day?

answer: 380 trillions kg

What percentage of the world's population recycles?

answer: 20%

How many litres of water does a person use on average every day?

answer: 100-200 liters

How many billions of people do not have the access to clean drinking water?

answer: 2 billions

How long does it take for a mobile battery to decompose?

answer: 1000 years

What percentage of mobile phones is thrown away after the first 2 years of usage?

answer: 50%

How many kilometers can an electric car travel on one full charge?

answer: 200-400 km

How many thousands kilometers does a person travel on average each year?

answer: 20 000 km

How many times can a cotton bag be reused?

answer: 100-1000 times

How many millions kilograms of clothing is thrown away each day?

answer: 85 millions kg

How long does it take for a glass bottle to decompose?

answer: 1 million years

How many weeks does it take for a banana peel to decompose?

answer: 2 -5 weeks

How many years does it take for a plastic straw to decompose in the nature?

answer: 100-1000

**How many hours a day
does the sun shine on
Earth?**

answer: around 12 hours

**How many years does it take
for a chewing gum to
decompose in the nature?**

answer: around 20 years
